DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over AAPA figures 1-4 and description thereof in view of Brahmhatt (of record) for reasons of record.

Response to Arguments

3. Applicant's arguments filed 10/15/02 have been fully considered but they are not persuasive.

 ^{applicant}
The appears to argue that it would not have been obvious to have substituted the native FET transistors in place of the conventional FET transistors of the AAPA figures 1-4 because Brahmhatt teaches solving a different problem.

This argument is not persuasive because the fact that applicant has recognized another advantage which would flow naturally from following the suggestion of the prior art cannot be the basis for patentability when the differences would otherwise be obvious. See *Ex parte Obiaya*, 227 USPQ 58, 60 (Bd. Pat. App. & Inter. 1985).

Additionally, as noted in MPEP 2144.06, "an express suggestion to substitute one equivalent component or process for another is not necessary to render such substitution obvious".

Accordingly, the rejections are sustained.
